OPSWAT renewal

Product		Description	Qty.
1	MD-CORE-8-1YR	This Windows ONLY package includes 8 antimalware engines - currently included engines listed at this link: https://www.opswat.com/products/metadefender/enterprise	1
2	OPSWAT CENTRAL MANAGEMENT-1YR	OPSWAT Central Management streamlines OPSWAT product configuration and enhances the security stance of organizations to protect against risky devices with OPSWAT Client. OPSWAT Central Management offers administrators a single management console to view risks, update security policy and settings for OPSWAT Product instances, and manage anti-malware virus definitions. Licenses for other OPSWAT products and OPSWAT Client are sold separately.	1
3	MD-ICAP-1YR	MetaDefender ICAP Server protects web traffic or storage devices from advanced cybersecurity threats such as zero-day attacks, phishing, ransomware, and others that bypass sandboxes, AI-based and traditional cyber attack prevention. MetaDefender ICAP Server integrates to ICAP enable devices such as reverse, forward proxies, and compatible NAS (network-attached storage) devices. This product leverages MetaDefender technologies such as multi-scanning, DLP, CDR (data sanitization), threat intelligence and vulnerability checks of IoT firmware and application installers. Price reflects per instance enablement cost. MetaDefender Core technology enablement (CDR, DLP, multi-scanning, etc.) licensed separately.	1
