The Department of Finance in Ajman announced linking the services of the Ajman smart payment gateway to the third generation e-dirham card, thus becoming the first local government agency to provide third-generation cards as a payment option in its system to collect the financial compensation for the services of local government agencies in the Emirate of Ajman. This step is in line with the Ajman Department of Finance's strategy aimed at supporting digital transformation and providing new payment channels that fit the requirements of customers and provide a distinctive experience according to the highest levels of ease, comfort and a high degree of security. It also integrates with the department's efforts to contribute to achieving a sustainable green economy in which customers feel happy. Great about the services provided to them. His Excellency Marwan Ahmed Al Ali, Director General of the Department of Finance in Ajman, said we are pleased that the Ajman Smart Payment Gateway is the first payment system for a local government to link its services to the third generation of e-dirham, which represents a qualitative leap that advances electronic payment processes to become more smooth and secure, and we value the efforts of the Ministry The Ministry of Finance in the country is in the process of completing the implementation of the first phase of the future transformation of the e-dirham system. He added that the Ajman Finance Department seeks to continuously develop the Ajman smart payment gateway system by providing multiple payment options and channels that keep pace with the latest international standards and suit the various categories of customers, in order to achieve the department's endeavors in saving time. Effort on customers and improve the quality and efficiency of the services provided to them, and ensure that they are given a smooth experience when paying government fees. For his part, His Excellency Younis Haji Al-Khoury, Undersecretary of the Ministry of Finance, said the Ministry of Finance, in line with the directives of the wise leadership, seeks to develop the e-dirham system by investing in the latest technologies, and enhancing the system's interconnection with payment systems, financial and service systems in the country to provide the best digital solutions and keep pace with the latest developments. He added that the e-Dirham system plays a vital role in facilitating and enhancing the efficiency of cashless payment of government services fees, which supports efforts to upgrade the infrastructure of the digital financial economy, and we are pleased that the Ajman Department of Finance is the first Local government The third generation cards provide an option to pay in its system to collect the financial compensation for government services.
