Department of Finance in Ajman organized an awareness workshop on the monthly closings and financial reports, as part of its endeavors and its constant keenness to raise the levels of efficiency and effectiveness of the institutional work system and enhance the position of the department in the field of public financial management, which contributes to achieving the strategic objectives of the department and the government of the Emirate of Ajman in general. Rashid Al Raisi, Director of the Financial Operations Department at the Department of Finance in Ajman, said that the course aimed to discuss the challenges facing the departments in the monthly closing operations and to emphasize the mechanism of closures to apply them in accordance with the best international standards and practices adopted in this field, in addition to raising the level of awareness about the proof and registration of financial transactions according to the accrual basis. And applying the best accounting methodologies to develop government financial work. Al Raisi explained that the Ajman Finance Department is keen to enhance the capabilities of financial staff at the Ajman government level, prepare them to manage government financial work in an optimal manner, and motivate them to adopt the best professional practices, to be employed in line with the financial policies and the state's directions for the next fifty years. He stressed the belief of Ajman Finance in the importance of the human element and its role in leading the future. Therefore, it continues its efforts to familiarize Ajman government employees with all methodologies of monthly closures and financial reports by providing accurate data that enables decision makers to make appropriate plans, including a situation that contributes to advancing the wheel of sustainable economic development in the emirate, and thus reaching To a better and more sustainable future.
